DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 27, 2005 has been entered.

Continuation

The specification as amended originally on July 3, 2001, should be amended further to reflect the updated status of Patent Application Serial Number 08/834,436 (now issued as U.S. Patent No. 6,282,061).

Election/Restrictions

Claims 19, 22 and 30-32 are currently pending.

Claims 1-18, 20, 21 and 23-29 have been voluntarily cancelled by the Applicants.

The Applicants have elected Species I (corresponding to FIGS. 3A and 3B) without traverse in Paper No. 15 (filed April 12, 2004).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

Application/Control Number: 09/898,806 Page 3

Art Unit: 2652

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 30 is rejected under 35 U.S.C. 102(b) as being anticipated by Koshikawa et al. (JP 04-366408 A).

As per claim 30, Koshikawa et al. (JP 04-366408 A) discloses a magnetic head comprising: a slider (see FIGS. 1(a) and 1(b)) having a rail (11) with a top surface (bottommost surface as seen in FIG. 1(a)) extending in a longitudinal direction thereof; a thin-film element part (20) to write and read information, formed on an end of said rail top surface (i.e., exposed at the air bearing surface) of said slider along the longitudinal direction; and a protective film (18) formed on said thin-film element part (20) and defining a distal end of the rail along the longitudinal direction (e.g., FIG. 1(b)) whereby air exits said slider at said distal end, said protective film (18) having a recess (curved recess (21) as seen in FIG. 1) which extends in the longitudinal direction (see FIG. 1) between said thin-film element part (20) and said distal end, and having a top surface substantially parallel to the rail top surface as seen in FIG. 1(a) (e.g., flat surface (21)).

Response to Arguments

Applicants' arguments with respect to claim 30 has been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2652

Allowable Subject Matter

Claims 19, 22, 31 and 32 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William J. Klimowicz whose telephone number is (571) 272-7577. The examiner can normally be reached on Monday-Thursday (6:30AM-5:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, A. L. Wellington can be reached on (571) 272-4483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-Q197 (toll-free).
